Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Commission Regulation (EU) 2015/830

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier	
Product name	Castrol Transmax Universal 75W-90
Product code	469688-DE04
SDS no.	469688
Product type	Liquid.
1.2 Relevant identified uses of	of the substance or mixture and uses advised against
Use of the substance/ mixture	Gear oils For specific application advice see appropriate Technical Data Sheet or consult our company representative.
1.3 Details of the supplier of	the safety data sheet
Supplier	Castrol Lubricants, Div.BP Europa SE - BP Belgium Amocolaan 2 2440 Geel BELGIE Tel. 03 2860811
E-mail address	MSDSadvice@bp.com
1.4 Emergency telephone nu	mber
EMERGENCY TELEPHONE NUMBER	Carechem: +44 (0) 1235 239 670 (24/7)
SECTION 2: Hazards	identification
2.1 Classification of the subst	ance or mixture
Product definition	Mixture
Classification according to F Not classified.	Regulation (EC) No. 1272/2008 [CLP/GHS]
See sections 11 and 12 for mo	re detailed information on health effects and symptoms and environmental hazards.
2.2 Label elements	
Signal word	No signal word.
Hazard statements	No known significant effects or critical hazards.
Precautionary statements	
Prevention	Not applicable.
Response	Not applicable.
Storage	Not applicable.
Disposal	Not applicable.
Supplemental label elements	Contains Polysulfides, di-tert-Bu, Reaction products of 4-methyl-2-pentanol and diphosphorus pentasulfide, propoxylated, esterified with diphosphorus pentaoxide, and salted by amines, C12-14- tert-alkyl and magnesium metaborate. May produce an allergic reaction. Safety data sheet available on request.
EU Regulation (EC) No. 1907	7/2006 (REACH)
Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles	Not applicable.
	onte
Special packaging requirement	

Product name	Castrol Transm	ax Universal 75W-90		Product code	469688-DE04	Page: 1/12
Version 4	Date of issue	14 June 2022	Format	Belgium	Language	ENGLISH
Date of prev	vious issue	19 April 2021.		(Belgium)		

SECTION 2: Hazards identification

Containers to be fitted with child-resistant fastenings	Not applicable.
Tactile warning of danger	Not applicable.
2.3 Other hazards	
Results of PBT and vPvB assessment	Product does not meet the criteria for PBT or vPvB according to Regulation (EC) No. 1907/2006, Annex XIII.
Product meets the criteria for PBT or vPvB according to Regulation (EC) No. 1907/2006, Annex XIII	This mixture does not contain any substances that are assessed to be a PBT or a vPvB.
Other hazards which do not result in classification	Experimental data on one or more of the components has been used to determine all or part of the hazard classification of this product. Defatting to the skin.

SECTION 3: Composition/information on ingredients

Mixture

3.2 Mixtures

Product definition

Highly refined base oil (IP 346 DMSO extract < 3%). Synthetic base stock. Proprietary performance additives.

Product/ingredient name	Identifiers	%	Regulation (EC) No. 1272/2008 [CLP]	Туре

------------------------------------	----------------

Product name	Castrol Transma	ax Universal 75W-90		Product code 4696	88-DE04	Page: 2/12
Version 4	Date of issue	14 June 2022	Format	Belgium	Language	ENGLISH
Date of previo	us issue	19 April 2021.		(Belgium)		

SECTION 3: Composition/information on ingredients

Occupational exposure limits, if available, are listed in Section 8.

SECTION 4: First aid measures

A Description of the state of t

4.1 Description of first ald me	easures
Eye contact	In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Eyelids should be held away from the eyeball to ensure thorough rinsing. Check for and remove any contact lenses. Get medical attention.
Skin contact	Wash skin thoroughly with soap and water or use recognised skin cleanser. Remove contaminated clothing and shoes. Wash clothing before reuse. Clean shoes thoroughly before reuse. Get medical attention if irritation develops.
Inhalation	If inhaled, remove to fresh air. Get medical attention if symptoms occur.
Ingestion	Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.
Protection of first-aiders	No action shall be taken involving any personal risk or without suitable training.

4.2 Most important symptoms and effects, both acute and delayed

See Section 11 for more detailed information on health effects and symptoms.

Potential	acute	<u>health</u>	<u>effects</u>

Inhalation	Vapour inhalation under ambient conditions is not normally a problem due to low vapour pressure.
Ingestion	No known significant effects or critical hazards.
Skin contact	Product not classified for sensitisation. Based on data available for this or related materials.
Eye contact	Not classified as an eye irritant. Based on data available for this or related materials.
Delayed and immediat	e effects as well as chronic effects from short and long-term exposure
Inhalation	Overexposure to the inhalation of airborne droplets or aerosols may cause irritation of the respiratory tract.
Ingestion	Ingestion of large quantities may cause nausea and diarrhoea.
Skin contact	Prolonged or repeated contact can defat the skin and lead to irritation and/or dermatitis.
Eye contact	Potential risk of transient stinging or redness if accidental eye contact occurs.

4.3 Indication of any immediate medical attention and special treatment needed

Notes to physician Treatment should in general be symptomatic and directed to relieving any effects.

SECTION 5: Firefighting measures

_	-	
5.1 Extinguishing media		
Suitable extinguishing media	In case of fire, use foam, dry chemical or carbon dioxide extinguisher or spray.	
Unsuitable extinguishing media Do not use water jet. The use of a water jet may cause the fire to spread by spl burning product.		
5.2 Special hazards arising fro	om the substance or mixture	
Hazards from the substance or mixture	In a fire or if heated, a pressure increase will occur and the container may burst.	
Hazardous combustion products	Combustion products may include the following: carbon oxides (CO, CO_2) (carbon monoxide, carbon dioxide)	
5.3 Advice for firefighters		
Special precautions for fire-fighters	No action shall be taken involving any personal risk or without suitable training. Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire.	
Special protective equipment for fire-fighters	Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.	

Product name	Castrol Transma	ax Universal 75W-90		Product code 4	469688-D	E04	Page: 3/12
Version 4	Date of issue	14 June 2022	Format	Belgium		Language	ENGLISH
Date of previo	us issue	19 April 2021.		(Belgium)			

SECTION 6: Accidental release measures

6.1 Personal precautions, prote	ective equipment and emergency procedures
For non-emergency personnel	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Floors may be slippery; use care to avoid falling. Put on appropriate personal protective equipment.
For emergency responders	If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
6.2 Environmental precautions	Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
6.3 Methods and material for co	ontainment and cleaning up
Small spill	Stop leak if without risk. Move containers from spill area. Absorb with an inert material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
Large spill	Stop leak if without risk. Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor.
6.4 Reference to other sections	See Section 1 for emergency contact information. See Section 5 for firefighting measures. See Section 8 for information on appropriate personal protective equipment. See Section 12 for environmental precautions. See Section 13 for additional waste treatment information.

SECTION 7: Handling and storage

7.1 Precautions for safe ha	ndling						
Protective measures	Put on appropriate personal protect	tive equipment.					
Advice on general occupational hygiene	Eating, drinking and smoking should be prohibited in areas where this material is handled stored and processed. Wash thoroughly after handling. Remove contaminated clothing protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.					ygiene stored and processed. Wash thoroughly after handling. Remove contaminated cloth protective equipment before entering eating areas. See also Section 8 for additional	oughly after handling. Remove contaminated clothing and
7.2 Conditions for safe storage, including any incompatibilities	from incompatible materials (see S container tightly closed and sealed be carefully resealed and kept upri	ulations. Store in a dry, cool and well-ventilated area, away Section 10). Keep away from heat and direct sunlight. Keep I until ready for use. Containers that have been opened musi ight to prevent leakage. Store and use only in equipment/ his product. Do not store in unlabelled containers.					
Not suitable	Prolonged exposure to elevated temp	erature.					
7.3 Specific end use(s)							
Recommendations	See section 1.2 and Exposure sce	narios in annex, if applicable.

Whilst specific OELs for certain components may be shown in this section, other components may be present in any mist, vapour or dust produced. Therefore, the specific OELs may not be applicable to the product as a whole and are provided for guidance only.

Recommended monitoring procedures

If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to monitoring standards, such as the following: European Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

Derived No Effect Level

No DNELs/DMELs available.

Predicted No Effect Concentration

Date of previous issue	19 April 2021.	(Belgium)		

SECTION 8: Exposure controls/personal protection

technical information on breakthrough times for the recommended glove type. Our recommendations on the selection of gloves are as follows:

Continuous contact:

	Continuous contact:
	Gloves with a minimum breakthrough time of 240 minutes, or >480 minutes if suitable gloves can be obtained.
	If suitable gloves are not available to offer that level of protection, gloves with shorter breakthrough times may be acceptable as long as appropriate glove maintenance and replacement regimes are determined and adhered to.
	Short-term / splash protection:
	Recommended breakthrough times as above. It is recognised that for short-term, transient exposures, gloves with shorter breakthrough times may commonly be used. Therefore, appropriate maintenance and replacement regimes must be determined and rigorously followed.
	Glove Thickness:
	For general applications, we recommend gloves with a thickness typically greater than 0.35 mm.
	It should be emphasised that glove thickness is not necessarily a good predictor of glove resistance to a specific chemical, as the permeation efficiency of the glove will be dependent on the exact composition of the glove material. Therefore, glove selection should also be based on consideration of the task requirements and knowledge of breakthrough times. Glove thickness may also vary depending on the glove manufacturer, the glove type and the glove model. Therefore, the manufacturers' technical data should always be taken into account to ensure selection of the most appropriate glove for the task.
	Note: Depending on the activity being conducted, gloves of varying thickness may be required for specific tasks. For example:
	• Thinner gloves (down to 0.1 mm or less) may be required where a high degree of manual dexterity is needed. However, these gloves are only likely to give short duration protection and would normally be just for single use applications, then disposed of.
	• Thicker gloves (up to 3 mm or more) may be required where there is a mechanical (as well as a chemical) risk i.e. where there is abrasion or puncture potential.
Skin and body	Use of protective clothing is good industrial practice. Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
	Cotton or polyester/cotton overalls will only provide protection against light superficial contamination that will not soak through to the skin. Overalls should be laundered on a regular basis. When the risk of skin exposure is high (e.g. when cleaning up spillages or if there is a risk of splashing) then chemical resistant aprons and/or impervious chemical suits and boots will be required.
<u>Refer to standards:</u>	Respiratory protection: EN 529 Gloves: EN 420, EN 374 Eye protection: EN 166 Filtering half-mask: EN 149 Filtering half-mask with valve: EN 405 Half-mask: EN 140 plus filter Full-face mask: EN 136 plus filter Particulate filters: EN 143 Gas/combined filters: EN 14387
Environmental exposure controls	Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

SECTION 10: Stability	and reactivity
10.1 Reactivity	No specific test data available for this product. Refer to Conditions to avoid and Incompatible materials for additional information.
10.2 Chemical stability	The product is stable.
10.3 Possibility of hazardous reactions	Under normal conditions of storage and use, hazardous reactions will not occur. Under normal conditions of storage and use, hazardous polymerisation will not occur.
10.4 Conditions to avoid	Avoid all possible sources of ignition (spark or flame).
10.5 Incompatible materials	Reactive or incompatible with the following materials: oxidising materials.
10.6 Hazardous decomposition products	Under normal conditions of storage and use, hazardous decomposition products should not be produced.

SECTION 11: Toxicological information

11.1 Information on toxicological effects

Acute toxicity estimates

Information on likely routes of exposure

Routes of entry anticipated: Dermal, Inhalation.

Potential acute health effects

r otoritiar abato rioatti orioo	
Inhalation	Vapour inhalation under ambient conditions is not normally a problem due to low vapour pressure.
Ingestion	No known significant effects or critical hazards.
Skin contact	Product not classified for sensitisation. Based on data available for this or related materials.
Eye contact	Not classified as an eye irritant. Based on data available for this or related materials.
Symptoms related to the ph	nysical, chemical and toxicological characteristics
Inhalation	May be harmful by inhalation if exposure to vapour, mists or fumes resulting from thermal decomposition products occurs.
Ingestion	No specific data.
Skin contact	Adverse symptoms may include the following: irritation dryness cracking
Eye contact	No specific data.
Delayed and immediate effe	ects as well as chronic effects from short and long-term exposure
Inhalation	Overexposure to the inhalation of airborne droplets or aerosols may cause irritation of the respiratory tract.
Ingestion	Ingestion of large quantities may cause nausea and diarrhoea.
Skin contact	Prolonged or repeated contact can defat the skin and lead to irritation and/or dermatitis.
Eye contact	Potential risk of transient stinging or redness if accidental eye contact occurs.
Potential chronic health eff	<u>ects</u>
General	No known significant effects or critical hazards.
Carcinogenicity	No known significant effects or critical hazards.
Mutagenicity	No known significant effects or critical hazards.
Developmental effects	No known significant effects or critical hazards.
Fertility effects	No known significant effects or critical hazards.

Product name	Castrol Transm	ax Universal 75W-90		Product code	469688-DE04	Page: 8/12

SECTION 12: Ecological information

12.1 Toxicity

Environmental hazards Not classified as dangerous

12.2 Persistence and degradability

Not expected to be rapidly degradable.

12.3 Bioaccumulative potential

This product is not expected to bioaccumulate through food chains in the environment.

12.4 Mobility in soil	
Soil/water partition coefficient (Koc)	Not available.
Mobility	Spillages may penetrate the soil causing ground water contamination.

12.5 Results of PBT and vPvB assessment

Product does not meet the criteria for PBT or vPvB according to Regulation (EC) No. 1907/2006, Annex XIII.

12.6 Other adverse effects

Other ecological information	Spills may form a film on water surfaces causing physical damage to organisms. Oxygen
	transfer could also be impaired.

SECTION 13: Disposal considerations

Yes.

13.1 Waste treatment methods

Product

Methods of disposal

Where possible, arrange for product to be recycled. Dispose of via an authorised person/ licensed waste disposal contractor in accordance with local regulations.

Hazardous waste

European waste catalogue (EWC)

Waste code	Waste designation	
13 02 08*	other engine, gear and lubricating oils	

However, deviation from the intended use and/or the presence of any potential contaminants may require an alternative waste disposal code to be assigned by the end user.

Packaging

Methods of disposal	Where possible, arrange for product to be recycled. Dispose of via an authorised person/ licensed waste disposal contractor in accordance with local regulations.
Special precautions	This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

Abbreviations and acronyms ADN = European Provisions concerning the International Carriage o Inland Waterway ADR = The European Agreement concerning the International Carria Road	of Dangerous Goods by
ADR = The European Agreement concerning the International Carrie	
	age of Dangerous Goods by
	age of Dangerous Coous by
ATE = Acute Toxicity Estimate	
BCF = Bioconcentration Factor	
CAS = Chemical Abstracts Service	
CLP = Classification, Labelling and Packaging Regulation [Regulation	on (EC) No. 1272/2008]
CSA = Chemical Safety Assessment	
CSR = Chemical Safety Report	
DMEL = Derived Minimal Effect Level	
DNEL = Derived No Effect Level	
EINECS = European Inventory of Existing Commercial chemical Sub	bstances
ES = Exposure Scenario	
EUH statement = CLP-specific Hazard statement	
EWC = European Waste Catalogue	
GHS = Globally Harmonized System of Classification and Labelling	of Chemicals
IATA = International Air Transport Association	
IBC = Intermediate Bulk Container	
IMDG = International Maritime Dangerous Goods	
LogPow = logarithm of the octanol/water partition coefficient	
MARPOL = International Convention for the Prevention of Pollution	From Ships, 1973 as
modified by the Protocol of 1978. ("Marpol" = marine pollution)	
OECD = Organisation for Economic Co-operation and Development	I
PBT = Persistent, Bioaccumulative and Toxic	
PNEC = Predicted No Effect Concentration	
REACH = Registration, Evaluation, Authorisation and Restriction of	Chemicals Regulation
[Regulation (EC) No. 1907/2006]	ana na sa
RID = The Regulations concerning the International Carriage of Dan	igerous Goods by Rail
RRN = REACH Registration Number	
SADT = Self-Accelerating Decomposition Temperature SVHC = Substances of Very High Concern	
STOT-RE = Specific Target Organ Toxicity - Repeated Exposure	
STOT-SE = Specific Target Organ Toxicity - Repeated Exposure	
TWA = Time weighted average	
UN = United Nations	
UVCB = Complex hydrocarbon substance	
VOC = Volatile Organic Compound	
vPvB = Very Persistent and Very Bioaccumulative
